

Sean Rada

Director, Innovation and Solutions Development

Sean is an innovative problem solver with a passion for building tech solutions with impact.

He became a self-made entrepreneur in the mobile app world before joining Rigil in 2012 as their first in-house iOS developer. He became Rigil's full-stack product developer, a project manager, and a client advisor before joining the Leadership Team in 2019 as a Deputy Director. Under his leadership, Rigil established and grew its product offerings in the federal and commercial spaces.

Sean serves as a resident expert on solutions development and driving innovation at Rigil. He is responsible for growing the company's funded innovation programs. He guides product and software development and helps our technical team and the company stay at the forefront of what's next.

Sean has a Bachelor's degree in Systems Engineering from the University of Virginia, and resides in Washington, D.C.
